

Southern Ontario College of Osteopathy
Visceral Osteopathy
(Course outline) 46 hours
Part 1 & 2

1. History
2. Basic Concepts
3. Embryology
4. Anatomy and Physiology
5. Pathology
6. Visceral Articulations
7. Methods of Evaluation
8. Visceral Treatment Techniques
9. Gastrointestinal (GI) System
 - Embryology
 - Anatomy and Physiology
 - Pathology
 - Physical Examination
 - The Liver and Biliary System
 - Topographical anatomy
 - Mobility and Motility Tests
 - Treatment Techniques
 - The Stomach
 - Topographical anatomy
 - Mobility and Motility Tests
 - Treatment Techniques
 - Small Intestine and Pancreas
 - Topographical anatomy
 - Mobility and Motility Tests
 - Treatment Techniques
 - Large Intestine
 - Topographical anatomy
 - Mobility and Motility Tests
 - Treatment Techniques

10. Lungs

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Mobility and Motility Tests
- Treatment Techniques

11. Cardiovascular System and Spleen

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Mobility and Motility Tests
- Treatment Techniques

12. Kidneys

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Mobility and Motility Tests
- Treatment Techniques

13. Bladder

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Mobility and Motility Tests
- Treatment Techniques

14. The Female Reproductive Organs

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Mobility and Motility Tests
- Treatment Techniques

15. Psoas muscles

- Embryology
- Anatomy and Physiology
- Pathology
- Topographical anatomy
- Physical Examination
- Treatment Techniques

16. Integrative Visceral Therapy
